EDUCATION

Mechanical Engineering, B.E.

All India Shri Shivaji Memorial
Society's College of Engineering
August 2015 - June 2018

Mechanical Engineering, Diploma

Dr A D Shinde Institute of
Technology
July 2012 - June 2015

10th, S.S.C.

S. S. High School, Nesari
June 2011 - March 2012

TECHNICAL SKILLS

Java | Java EE | Hibernate |
Spring Boot | Spring Data JPA |
RESTful APIs | MySQL | HTML5 |
CSS3 | JavaScript | React | SDLC |
Agile Methodology | AWS | Docker |
Kubernetes | Jenkins

SOFT SKILLS

Quickly Adaptable |
Time Management |
Problem Solving | Teamwork

INTERESTS

- Reading

ACHIEVEMENTS

- Rank 2 in BTech.,
All India Shri Shivaji Memorial
Society's College of Engineering,
Pune
- Got first place in Robotics
Championship,
IIT Mumbai
- Runner-up in Diploma,
Dr A D Shinde Institute of
Technology

PROFESSIONAL SUMMARY

Dynamic Full Stack Java Developer with more than one year of experience, skilled in Java and ReactJS stack. Proficient in creating efficient server-side APIs with Spring boot and along with developing robust frontend components using React.js. Adept at utilizing Generative AI and rapidly learning new technologies to enhance productivity.

WORK EXPERIENCE

Catalyst IT Pvt. Ltd.

Java Developer | May 2023-present

Job responsibilities:

- Performed quality checks for newly developed websites with 97% accuracy, ensuring reliable and stable applications.
- Collaborated with a team of 5 junior developers to support automated error identification, demonstrating strong problem-solving and collaborative skills.
- Developed and maintained RESTful APIs conforming to industry standards, showcasing comprehensive knowledge of API design and development.
- Got well versed in frontend technologies, providing a foundation for effective full-stack development.

PROJECTS

1. Blog Management System |

spring boot | Spring Security | React | RESTful APIs | CSS3 | HTML5 | JavaScript |
JWT Authentication | Hibernate | Spring Data JPA | MySQL |
Responsive Web Design

- Conceptualized and built a blogging platform from scratch, featuring comprehensive CRUD operations and category-specific browsing.
- Implemented a seamless user experience with functionalities including post creation, editing, and commenting.
- Utilized Spring Boot, React, Spring Security, and RESTful APIs to ensure secure and scalable application development.

2. Grofers - E-Commerce |

RESTful APIs | Spring Boot | Hibernate | MySQL | Spring Data JPA |
Spring Security | JWT Authentication | React | HTML5 | JavaScript

- Developed a dynamic frontend for the Grofers website using React.js, ensuring a seamless user experience for both admin and customer roles.
- Designed and implemented efficient and secure RESTful APIs with Spring Boot to handle various operations such as product selection, cart management, and order placement.
- Utilized MySQL, Spring Data JPA, and Hibernate to create and optimize database models and queries for efficient data management.
- Implemented role-based authorization using Spring Security and JWT Authentication to ensure secure access to application features.
