  Society's College of Engineering
- Got first place in Robotics
  Championship,
  IIT Mumbai

PROFESSIONAL SUMMARY

Dynamic Full Stack Java Developer skilled in Java and ReactJS stack. Proficient in creating efficient server-side APIs with Spring boot and along with developing robust frontend components using React.js. Adept at utilizing Generative AI and rapidly learning new technologies to enhance productivity.

PROJECTS

1. Blog Management System | 🐙

spring boot | Spring Security | React | RESTful APIs | CSS3 | HTML5 | JavaScript | JWT Authentication | Hibernate | Spring Data JPA | MySQL | |
Responsive Web Design

- Designed and built a Blog Management System to create, manage, and interact with blog posts across categories.
- Developed both the frontend and backend using React and Spring Boot, including secure JWT authentication.
- Implemented CRUD operations for posts and comments and user management functionalities.

2. Cinema Booking System | 🐙

RESTful APIs | React | HTML5 | CSS3 | JavaScript | Spring Boot | Spring Security | JWT Authentication | Hibernate | MySQL | Spring Data JPA | Reactstrap | Responsive Web Design

- Designed and implemented a user-friendly interface for seamless movie ticket reservations and seat selection using React, HTML5, and CSS3.
- Developed efficient server-side APIs with Spring Boot and Spring Security to ensure secure and reliable backend operations.
- Integrated JWT Authentication for secure user login and session management.
